

COMFORT SYNC™

Programmable
Communicating
Wi-Fi Thermostat

BRING AN ADVANCED LEVEL OF PRECISION AND EFFICIENCY TO YOUR HOME.

THE PROFESSIONAL'S CHOICE

ARMSTRONG
AIR®
The Professional's Choice

A closer look at the capabilities of Comfort Sync™.

The Comfort Sync touchscreen thermostat offers technologically advanced management of your HVAC system, the system that uses more energy than anything else in your home. From remote access via smartphone, tablet or laptop to live weather forecasts to an energy-saving One-Touch Away Mode, Comfort Sync upholds the Armstrong Air™ tradition of sophisticated heating and cooling solutions. And it's yet another reason Armstrong Air remains the choice of professionals across the country.

Comfort Sync does more than control the temperature. It manages your entire comfort system.

Comfort Sync is far more than a thermostat. It's a smart home HVAC control center with the ability to coordinate and manage every aspect of your system's operation for efficiency and peace of mind. Advanced scheduling and One-Touch Away Mode help you use less energy every day. For your convenience, service alerts and reminders tell you when service and maintenance are needed. And best of all, everything is controlled through a bright, high-definition touchscreen and an intuitive menu interface that make operating the Comfort Sync as easy as appreciating it.

One-Touch Away Mode

Saving energy has never been simpler. With just a touch on your way out the door, Comfort Sync can override your regular programming and go into a reduced-operation mode, allowing you to properly adjust the temperature of your empty home.

Live Weather Data

Comfort Sync can display real-time weather alerts and a five-day weather forecast with one simple touch, so you'll always know what the weather holds for your day.

Automatic Updates and Reminders

Stay up to date with your system quickly and conveniently with the alerts and reminders feature. When maintenance is required on your system or a problem arises, Comfort Sync sends both you and your dealer an email, so you always stay informed about your system's operation.

Programmability

Comfort Sync makes it easy to coordinate your home's heating and cooling system with your life. Sophisticated schedule programming allows your system to operate normally when you're home, and reduce system use when you and your family are out of the house—so you don't waste energy.

A woman with brown hair and sunglasses on her head is shown in profile, looking at a smartphone. She is outdoors, with a rocky, sunlit background. The smartphone screen displays the Comfort Sync app interface, which includes a large temperature reading of 72 degrees, a 'Summer' mode selector, and an 'auto' button. The app title 'Allied Sync Syst...' is visible at the top of the screen.

Connect to your Comfort Sync[™] thermostat easily and securely from anywhere.

Available free for Apple® and Android™ devices, the **Comfort Sync** app is an instant connection to your thermostat via smartphone, tablet or other web-enabled device. With just a touch, you can check the current temperature in one or more homes, and adjust the temperature or schedule as needed. Whether you're away from home or relaxing in your favorite chair, adjusting the temperature is as easy as a touch.

Comfort Sync and Armstrong Air™ equipment: the technologically advanced heating and cooling solution.

Armstrong Air believes that better comfort comes from better technology. The equipment we build continues to deliver greater performance and efficiency through even the most extreme weather. Comfort Sync proudly carries on the tradition of sophisticated technology with features like a five-day weather forecast, remote temperature access and adjustment, automatic alerts and reminders and sophisticated scheduling.

Comfort Sync delivers everything
you'd expect from Armstrong Air.

CRAFTSMANSHIP

Like everything we make, Comfort Sync is built to extremely high standards of quality and thoroughly tested to make sure it delivers trouble-free performance year after year.

EFFICIENCY

Programmable thermostats can save close to \$200 per year.* With intuitive scheduling and a convenient One-Touch Away Mode, Comfort Sync makes saving money almost second nature.

COMMITMENT

Armstrong Air believes in offering our customers more, even after your purchase, which is why you'll find Comfort Sync comes with a 10-Year Limited Warranty.**

The Comfort Sync[™]
Dashboard is your window
into advanced functionality.

Anytime you have access to a web-enabled computer, you have access to the extensive and powerful capabilities of Comfort Sync through the Comfort Sync Dashboard at **mycomfortsync.com**.

A My Account

During setup of your Comfort Sync, you'll create a unique user ID and online account that you can then use to manage and control every Comfort Sync thermostat you own. On the My Account screen, you'll be able to add and edit personal information and dealer information.

B Home(s)

This screen allows you to select which Comfort Sync thermostat you're accessing, should you have multiple thermostats in the same home or multiple thermostats in multiple homes.

C Away Mode

Allows you to set your Comfort Sync into an energy-saving mode should you forget to do so before you leave home, so you don't waste energy heating or cooling an empty house.

D Current Temperature and Humidity

Check and adjust either one with just a click or touch.

E Program

Allows you to set your Comfort Sync to follow a schedule based on your life, the season and the weather.

F Alerts and Reminders

Informs you of any current repairs, maintenance or service needed.

G Service Information

Edit information about your dealer, or email your dealer a question or concern.

H System

View or edit information about the home comfort system to which your Comfort Sync is connected.

I Forecast

Allows you to see a five-day weather forecast for your area, along with any current weather alerts.

Comfort Sync™ offers the features that make system management simple.

REMOTE ACCESS

Allows you to check and adjust your home's temperature from anywhere using your laptop, smartphone, tablet or other web-enabled device.

SIMPLE SCHEDULING

Helps you save energy with easy, intuitive heating and cooling schedules created around your lifestyle.

ONE-TOUCH AWAY MODE

Puts your system into an enhanced energy-saving mode when you leave.

ALERTS AND REMINDERS

When Comfort Sync detects that repairs and regular maintenance are needed, it alerts you or your dealer instantly via email.

WEATHER DATA

Using its connection to your wireless network, Comfort Sync can display a five-day forecast and live weather alerts.

TOUCHSCREEN OPERATION

The bright, high-definition touchscreen uses simple menus and icons to make even complex operations incredibly easy.

CUSTOMIZABLE SKINS

Available in many colors and patterns, they allow Comfort Sync to blend seamlessly into any décor, so it's as fashionable as it is functional.
